NetSupport DNA

We have partnered with NetSupport to enable us to bring you the most powerful monitoring solution available today – NetSupport DNA – and we're delighted to let you know that we have managed to secure a brilliant introductory rate for all Exa Education customers. You can now purchase NetSupport DNA for an annual cost of only £5.00 per licence, including support!

What does NetSupport DNA do?

Working alongside SurfProtect®, NetSupport offers advanced monitoring features to help keep your pupils safe in an increasingly complex online world. This award-winning tool provides the following benefits:

- **Safeguarding Assistance.** The Keyword & Phrase Monitoring feature provides you with an alert should a student engage in any activity which may place them in danger. The details of triggered words can then be reviewed in the form of a log, screenshot, or video. To see a visual overview of the types of content a student is searching for, a word cloud can be generated in just a click!

- **Ofsted Compliance.** Enabling deep and extremely detailed reporting, with records accessible at the click of a button, you can be assured that meeting Ofsted's filtering and monitoring requirements has never been simpler.

- **Device Control.** You have complete control over the way in which your school's devices are used – from disabling webcams on classroom computers, controlling access to content on memory sticks right through to the enforcement of acceptable use policies.

- **Network Visibility.** Making it easier than ever to do everything from managing licence compliance to monitoring print usage and deploying power management policies, you can ensure your IT services are as cost-effective as possible.

- **Appropriate Monitoring.** Providing you with the control to make your monitoring as sensitive as you'd like it to be, you are able to whitelist words which may generate false positive alerts. Covering twelve languages, you can be assured that offensive words will be detected – no matter how they are spelt!

- **Student Welfare.** Pupils are able to report issues discreetly to a nominated member of staff using the 'Report a Concern' feature present on all DNA-enabled PCs. You are also able to flag vulnerable students to ensure that you don't miss a thing for those most at risk.
