Internet & Filtering for Schools

# PupilMail

PupilMail is our child-friendly email service. Inclusive with every domain hosted with Exa Education, it is the perfect introduction to email for young students.

Developed and designed by Exa Education specifically for primary schools, it enables young children to become comfortable with an email system before being introduced to traditional mail clients.

## Features

- **User-friendly interface.** With its large, colourful icons and intuitive interface, PupilMail is easy and enjoyable for young students to use.
- **Inappropriate word filtering.** PupilMail is able to detect emails with offensive or inappropriate language and redirect them to a nominated staff member to be dealt with as required.
- **Simple set up.** If your school requires a large number of email accounts to be created, we can set these up on your behalf - all you need to do is let us know your preferred user name format, along with each pupil's name, and we'll do the rest! We'll even provide a secure password for every account if you'd like us to.
- **Restrict/allow specific addresses.** PupilMail enables you to block domains or individual accounts that you would like to prevent being able to send emails to students.
- **Completely customisable.** Each aspect of PupilMail's set up can be adapted according to your school's preferences; from which words are deemed inappropriate to the sensitivity of your spam filter.
- **Virus scanning and spam filtering.** All incoming emails are scanned and filtered to ensure pupils only receive safe, secure email content.
- **Unlimited email accounts.** With PupilMail, there is no limit to the number of users a school can have, or the amount of storage they have access to.

If you would like to learn more about PupilMail, please don't hesitate to get in touch.
